Bulletin (New Series) of the American Mathematical Society

This journal is devoted to articles of the following types:

Research-Expository Papers

These are, by definition, papers that present a clear and insightful exposition of significant aspects of contemporary mathematical research. Gibbs lectures, Progress in Mathematics lectures, and retiring presidential addresses will be included in this section.

Research Announcements

The purpose of this department is to publish quickly and disseminate widely significant new mathematics. A Research Announcement should be designed to communicate its contents to a broad mathematical audience and should meet high standards for clarity as well as mathematical content.

Research Reports

These are brief, timely reports on important mathematical developments. They are normally solicited and often written by a disinterested expert.

Book Reviews

Book Reviews are accepted for publication by invitation only. Unsolicited manuscripts will not be considered.

Subscription information. *Bulletin (New Series) of the American Mathematical Society* is published quarterly. Subscription prices for Volumes 30 and 31 (1994) are $228 list, $182 institutional member, $137 individual member. The subscription price for members is included in the annual dues. A late charge of 10% of the subscription price will be imposed upon orders received from nonmembers after January 1 of the subscription year. Subscribers outside the United States and India must pay a postage surcharge of $8.00; subscribers in India must pay a postage surcharge of $13.00. Expedited delivery to destinations in North America $12; elsewhere $21. Beginning in January 1992, the Bulletin will be available from the electronic service e-MATH [**telnet e-MATH.ams.org** (or **telnet 130.44.1.100**). Login and password are **e-math**.]

Back number information. For back issues see the *AMS Catalog of Publications.*

Subscriptions and orders should be addressed to the American Mathematical Society, P. O. Box 5904, Boston, MA 02206-5904. *All orders must be accompanied by payment.* Other correspondence should be addressed to P. O. Box 6248, Providence, RI 02940-6248.

Copying and reprinting. Individual readers of this publication, and nonprofit libraries acting for them, are permitted to make fair use of the material, such as to copy an article for use in teaching or research. Permission is granted to quote brief passages from this publication in reviews, provided the customary acknowledgment of the source is given.

Republication, systematic copying, or multiple reproduction of any material in this publication (including abstracts) is permitted only under license from the American Mathematical Society. Requests for such permission should be addressed to the Manager of Editorial Services, American Mathematical Society, P. O. Box 6248, Providence, RI 02940-6248. Requests can also be made by e-mail to `reprint-permission@math.ams.org`.

The appearance of the code on the first page of an article in this journal indicates the copyright owner's consent for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law, provided that the fee of $1.00 plus $.25 per page for each copy be paid directly to the Copyright Clearance Center, Inc., 222 Rosewood Drive, Danvers, MA 01923. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale.

Bulletin (New Series) of the American Mathematical Society is published quarterly by the American Mathematical Society at 201 Charles Street, Providence, RI 02904-2213. Second class postage is paid at Providence, Rhode Island, and additional mailing offices. Postmaster: Send address changes to Bulletin, American Mathematical Society, P. O. Box 6248, Providence, RI 02940-6248.

BULLETIN OF THE AMERICAN MATHEMATICAL SOCIETY
CONTENTS

Vol. 31, No. 1 July 1994

Research-Expository Papers

M. Ram Murty, Selberg's conjectures and Artin L-functions 1
K. Rubin and A. Silverberg, A report on Wiles' Cambridge lectures 15

Research Announcements

J. Esterle, E. Strouse, and F. Zouakia, Closed ideals of the algebra of absolutely convergent Taylor series 39
Y. Latushkin and S. Montgomery-Smith, Lyapunov theorems for Banach spaces 44
Georgia Triantafillou, Diffeomorphisms of manifolds with finite fundamental group 50
Reese Harvey and H. Blaine Lawson, Jr., A theory of characteristic currents associated with a singular connection 54
Seiichi Kamada, Alexander's and Markov's theorems in dimension four 64
Ittai Kan, Open sets of diffeomorphisms having two attractors, each with an everywhere dense basin 68

Book Reviews

M. H. A. Davis (Reviewer), Controlled Markov processes and viscosity solutions by W. H. Fleming and H. M. Soner 75
Gilbert Baumslag (Reviewer), Word processing in groups by David B. A. Epstein, J. W. Cannon, D. F. Holt, S. V. F. Levy, M. S. Paterson, and W. P. Thurston 86
Eric Behr (Reviewer), Infinite dimensional Lie superalgebras by Y. A. Bahturin, A. A. Mikhalev, V. M. Petrogradsky, and M. V. Zaicev . 91
Chris Peters (Reviewer), The geometry of algebraic Fermi curves by D. Gieseker, H. Knörrer, and E. Trubowitz 94
Robert Roussarie (Reviewer), Typical singularities of differential 1-forms and Pfaffian equations by Michail Zhitomirskii 98
M. A. Wertheimer (Reviewer), Designs and their codes by E. F. Assmus, Jr., and J. D. Key 102
Albert Nijenhuis (Reviewer), Natural operations in differential geometry by Ivan Kolář, Peter W. Michor, and Jan Slovák 108
J. Korevaar (Reviewer), The Schwarz function and its generalization to higher dimensions by Harold S. Shapiro 112
Leonard D. Berkovitz (Reviewer), Viability theory by Jean-Pierre Aubin 116
Michael Frazier (Reviewer), Theory of function spaces II by Hans Triebel 119
Harry Dym (Reviewer), The commutant lifting approach to interpolation problems by Ciprian Foias and Arthur E. Frazho 125

J. Diestel (Reviewer), Smoothness and renormings in Banach spaces by Robert DeVille, Gilles Godefroy, and Vaclav Zizler 140
Jürgen Scheurle (Reviewer), Fundamentals of dynamical systems and bifurcation theory by Milan Medved 142
Irving Kaplansky (Reviewer), Topological rings by Seth Warner 146
Louis H. Kauffman (Reviewer), Subfactors and knots by V. F. R. Jones . 147

Vol. 31, No. 2 **October 1994**

Research-Expository Papers

Curtis T. McMullen, Frontiers in complex dynamics 155

Research Announcements

A. A. Ivanov and S. V. Shpectorov, The flag-transitive tilde and Petersen-type geometries are all known 173
Chal Benson, Joe Jenkins, Ronald L. Lipsman, and Gail Ratcliff, The moment map for a multiplicity free action 185
M. A. Guest, Configuration spaces and the space of rational curves on a toric variety 191
S. Boyer and X. Zhang, Exceptional surgery on knots 197
Michael A. Bean, An isoperimetric inequality related to Thue's equation 204
R. del Rio, S. Jitomirskaya, N. Makarov, and B. Simon, Singular continuous spectrum is generic 208
Bart de Smit and Robert Perlis, Zeta functions do not determine class numbers 213
Edward C. Waymire and Stanley C. Williams, A general decomposition theory for random cascades 216
Victor H. de la Peña and S. J. Montgomery-Smith, Bounds on the tail probability of U-statistics and quadratic forms 223
David Gabai, On the geometric and topological rigidity of hyperbolic 3-manifolds 228

Book Reviews

P. A. Meyer (Reviewer), Measure theory by J. L. Doob 233
Louis de Branges (Reviewer), Classes of linear operators, Volume 2 by I. Gohberg, S. Goldberg, and M. A. Kaashoek 236
Peter S. Landweber (Reviewer), Nilpotence and periodicity in stable homotopy theory by Douglas C. Ravenel 243
R. J. Knops (Reviewer), Mathematical elasticity, Vol. 1. Three-dimensional elasticity by Phillippe Ciarlet 246
Abigail Thompson (Reviewer), The classification of knots and 3-dimensional spaces by Geoffrey Hemion 252
Alejandro Adem (Reviewer), Cohomological methods in transformation groups by Christopher Allday and Volker Puppe 254

Frederick R. Cohen (Reviewer), Complements of discriminants of smooth maps: Topology and applications by V. A. Vassiliev 258
Ray A. Kunze (Reviewer), Clifford algebras and Dirac operators in harmonic analysis by John E. Gilbert and Margaret A. M. Murray ... 266
Carl Herz (Reviewer), Harmonic analysis and represention theory for groups acting on homogeneous trees by Alessandro Figà-Talamanca and Claudio Nebbia 271
Gert K. Pedersen (Reviewer), Fundamentals in the theory of operator algebras, III–IV. An exercise approach by Richard V. Kadison and John R. Ringrose 275
Marco Avellaneda (Reviewer), An introduction to Γ-convergence by Gianni Dal Maso 277
J. W. Bruce (Reviewer), Dynamical systems VIII (singularity theory II), classification and applications, edited by V. I. Arnol'd, V. V. Goryunov, O. V. Lyashko, and V. A. Vasil'ev 283
G. Da Prato (Reviewer), Evolutionary integral equations and applications by Jan Prüss 288
Jean E. Taylor (Reviewer), Wulff construction, A global shape from local interaction by R. Dobrushin, R. Kotecky, and S. Shlosman 291
Walter Wenzel (Reviewer), Oriented matroids by A. Björner, M. Las Vergnas, B. Sturnfels, N. White, and G. Ziegler 296
Maciej P. Wojtkowski (Reviewer), Billiards. A genetic introduction to the dynamics of systems with impacts by V. V. Kozlov and D. V. Treshchev 298
John Franks (Reviewer), Hyperbolicity and sensitive chaotic dynamics at homoclinic bifurcations by J. Palis and F. Takens 301
Peter J. Olver (Reviewer), Dirac structures and integrability of nonlinear evolution equations by Irene Dorfman 305
Teresa Monteiro Fernandes (Reviewer), Contact geometry and linear differential equations by V. Nazaikinskii, V. Shatalov, and B. Y. Sternin 308
Hale Trotter (Reviewer), A course in computational algebraic number theory by Henri Cohen 312
Nicola Garofalo (Reviewer), Nonlinear potential theory of degenerate elliptic equations by J. Heinonen, T. Kilpeläinen, and O. Martio .. 318
G. Betsch (Reviewer), Nearrings—geneses and applications by James R. Clay 327
Raymond Rishel (Reviewer), Mathematical control theory: An introduction by Jerzy Zabczyk 330
